Purpose: software engineering and development support.

### **General Conditions for Subprocessors**

MPMX engages Subprocessors only where reasonably necessary for the provision, maintenance, security, or support of the Services.

Each Subprocessor is contractually bound by written obligations requiring appropriate technical and organizational security measures, confidentiality protections, and data protection safeguards consistent with applicable Data Protection Law.

MPMX remains responsible for the performance of its Subprocessors in accordance with the Data Processing Terms.

MPMX may also engage additional Subprocessors for ancillary operational services (such as monitoring, security tooling, communications infrastructure, or professional support services), provided such Subprocessors are subject to equivalent data protection obligations.

For questions regarding this Subprocessor List or to submit a data protection-related objection, Customer may contact MPMX via the contact channel specified in the Agreement.

**This Subprocessor List is effective as of the date of publication. Last updated: 01 May 2026.**
